Treasure Data
Partner Program
Program Aim

The Treasure Data Partner Program is designed to build an ecosystem of implementation and consulting professionals who can maximize the ROI of the end customer’s data.

We will identify and nurture the top performing partners through investment and recognition, and focus on continually increasing partner loyalty and top line revenue.

Ultimately the program aims to establish Treasure Data and its partners as leaders in the fast-growing customer data platform (CDP) industry.
Why Treasure Data

The opportunity for CDP-driven applications is large

$3-6 Trillion

• Integration
• Audience: Management/Segmentation
• Data: Activation/Analysis

Relevant to:
• Developers (JavaScript/SQL/Python)
• Data Analysts / Scientists
• Pre-Sales
• Solution Architects
• Marketing Operations
MDF Definition

Market Development Fund guidelines and usage

• For Partners with Gold or Silver tier, we will support you in planning, organizing and attending seminars and events for business development purposes.

• The event must be relevant to our joint business and attended for the purpose of promoting the Treasure Data CDP and/or our joint business proposition.

• MDF can be utilized for activity resulting in joint business for Treasure Data and the partner. (examples included alongside)

• If the acceptance of referrer or reseller fees are not permitted, these funds can be diverted into the MDF fund and be utilized for joint marketing purposes.
Reseller Rights

Value Added Reseller (VAR) Agreement

• Reseller Rights are only available to Silver and Gold tier partners.

• Treasure Data emphasizes the “Value Added” aspect and the expectation is that the partner will not only resell the license but also implement and/or manage the platform on behalf of the customer post implementation.

• Given the complexity of the contractual obligations, reseller rights will be covered by a separate contract (VAR Contract).

• Reseller rights utilize a sliding % discount model against list price which can be taken as profit or split with the end customer and is defined on the revenue models slide.

• The partner will receive the reseller fee on each renewal event for as long as they own the license on behalf of the customer.
Revenue Models
Rewarding joint business

Referral fees

- All tiered partners are eligible for referral fees.
- Referral fees are paid as % of the first-year annual contract value (ACV) on closing of deal.
- This value of the referral fee is capped at $25,000.

Reseller Discounts

- Reseller revenue can only be accessed by Silver or Gold partners that have signed the Treasure Data VAR agreement.
- The Reseller will receive an agreed-upon % discount based on the standard lowest list price at the time of sale.
- Resellers also have access to volume-based discounts as agreed in the VAR contract. This allows an additional discount % based on the amount of Monthly Recurring Revenue (MRR) being generated by the reseller.
Consultancy Partners

Thought and strategy leaders

- Consultancies play a critical role in shaping clients’ customer data and digital transformation strategy. Often, this includes defining the CDP use case roadmap and recommending world-class technology vendors.

- We understand that being consultative by its very nature requires you to remain agnostic and therefore joining any type of affiliate program may not make sense.

- As a consultancy partner, rather than join the formal partner program and by mutual agreement, we can engage by keeping you updated of our latest product capabilities, developments and roadmaps, much like we do with analyst groups.
Technology Partners

Extensions to the Treasure Data platform

- Technology partners extend Treasure Data CDP capabilities to solve for broader and more complex customer challenges.
- Partners include consent management, identity graph, data onboarding, business intelligence and second/third party data enrichment.
- You will be part of the Treasure Data partner program but are not placed into tiers.
- Access to a wealth of partner program benefits:
  - Treasure Data online educational and training resources.
  - Technical sandbox environment for development purposes.
  - Joint marketing opportunities including webinars, white-papers and blogs.
  - Promotion on Treasure Data partner website.
  - Joint account planning for strategic sales opportunities.
